A picture of the Twitchell waste dump, which has been reclaimed and planted. The picture was taken in April but the vegetation was becoming established.

Foreground is the barrier around the Eclipse pit. In the background is the Eclipse waste dump that was planted last year. April 1981.

Picture taken in April 1981, indicates clover and grass growth on the east Twitchell waste dump that has been reclaimed and planted. Film box indicates scale.

Wild Sego Lillies
are growing in the reclaimed
Twitchell haul road.

Photo indicates old foundations from the Vermillion mining in the 1930's, or natural growth. No reclamation seeding.

Picture of the old Iron Springs townsite dating back to about the mid 1930's. The native grass and bushes have almost obliterated indications of former occupation. The Eclipse Vermillion mine is in the background.

Picture was taken about April of 1981. A 988 frontend loader is indicated in the picture, building a berm around the perimeter of the abandoned Black Bird Pit.

Picture was taken about April 1981. A 988 front end loader is indicated in the picture, building a berm around the perimeter of the abandoned Blackbird Pit.

Shows the spring growth of grass planted in the fall of 1980 on the Blackbird haul road.

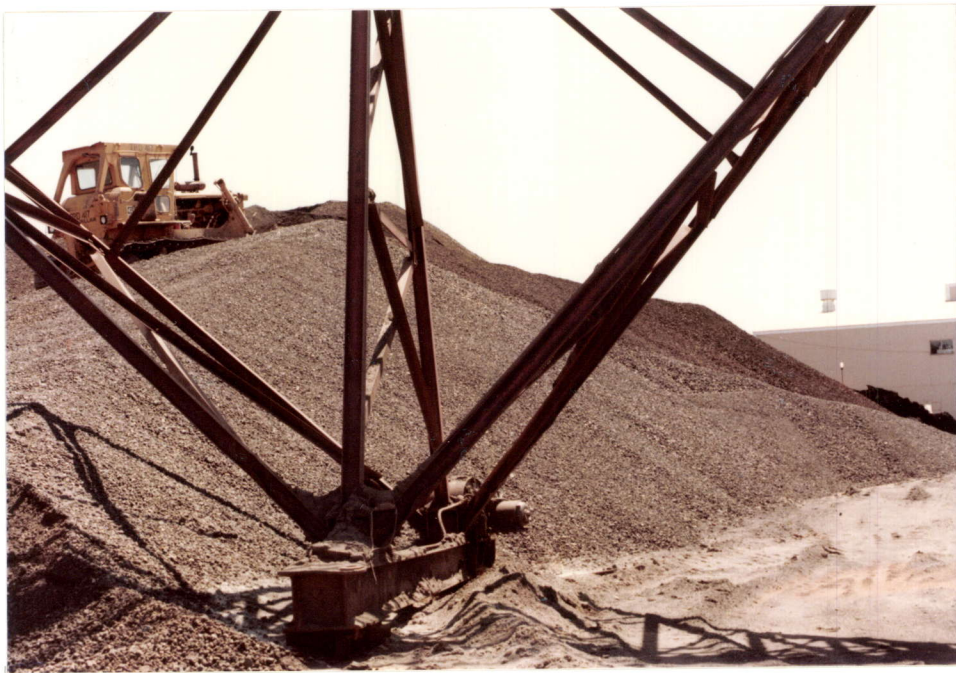

Picture is of the Zelma mined-out area and was taken in April of 1981. It shows a D-8 Dozer contouring the waste dump.

The Iron Springs shop and office site.

Picture of part of the Iron Springs Plant.

Some of the remaining iron ore in stockpile at the Iron Springs plant. Efforts are being made to sell and deplete this inventory before any further use, or sale and reclamation is recommended.
